

CS 4850 – Spring 2018
Weekly Progress Report 8

Tuesday, March 6
Group 5 - KSU Go

Reporting cycle is Thursday through the following Wednesday of each week

Work tasks accomplished last week:

Team Member	Accomplished Tasks (be specific)
Albert Lim	Finished the emergency feature. I also started planning and coordinating team to finish the basic features of the project.
Chase Godwin	Started implementing the News Feed feature.
Nicholas Wilson	Worked on setting the database with AWS, and started writing API documentation.
Anthony Schell	Started working on the Handshake feature.
Patrick Hilerio	Finished brushing up the D2L feature.
Dayton Chamberlain	Finishing the login implementation.

Work tasks planned for this week:

Team Member	Planned Tasks (be specific)
Albert Lim	Work on the contact directory feature by integrating with http://directory.kennesaw.edu/dir/people/ . Also, work on the presentation slides.
Chase Godwin	Work on the News Feed feature, and help Albert to implement contact directory feature.
Nicholas Wilson	Work on populating the database and write complete API documentation for team members to utilize the database.
Anthony Schell	Work on finishing up the Handshake feature, and work on the Owl Life implementation.
Patrick Hilerio	Work with Anthony to start and finish the Owl Life implementation
Dayton Chamberlain	Work on brushing up the login implementation. Also, start and finish the homepage feature.

Team Meetings Outside Class Time for last week:

Date and Time	Members Attended	Work Accomplished
3/3 and 3/4	Everyone	Work features implementations

Comments:

Everyone is working on their part as planned. This week is mainly focused on implementing the KSU Go app core features. Core features include:

1. Login
2. Homepage
3. D2L
4. Contact directory
5. News Feed
6. Emergency
7. Owl Life
8. Handshake
